EDUCATION

I.K.Gujral Punjab Technical University
B.Tech in Computer Science

Kapurthala, Punjab, India
2022 - 2026

TECHNICAL SKILLS

Languages: HTML5, Tailwind CSS, JavaScript.

Frameworks and Tools: React, Node.js, Next.js, Git.

Backend and Database: MongoDB, Firebase Authentication, Cloud Firestore

Deployment and DevOps Vercel, Git/GitHub, CI/CD

Additional Tools and Concepts RESTful API Integration, Error Handling, Code Splitting, Performance Optimization, Component-Based Architecture

WORK EXPERIENCE

Pisoft Informatics

Jan 2026 - Present

MERN Stack Intern

- * Developed and maintained scalable web applications using the MERN stack, contributing to multiple live projects from conceptualization to deployment.
- * Engineered custom RESTful APIs to facilitate seamless data communication between MongoDB and React-based front-end interfaces.
- * Implemented robust authentication systems using JSON Web Tokens (JWT) and managed secure user access via Role-Based Access Control (RBAC).

Scholiverse

May 2024 - July 2024

Web Developer

- * Built a React.js-based frontend for a real-time chatbot, enhancing user engagement and ensuring a smooth, interactive experience across all devices.
- * Automated data backup and maintenance tasks, saving 2 hours per week.
- * Collaborated with teammates to deliver a chatbot solution for a company client.

PROJECTS

• Auto-Swift, [View Project](#)

- * Developed a Vehicle Service Management web application using React, Node.js and Firebase.
- * Integrating a chatbot, mileage calculator, and service package management. Designed for streamlined vehicle servicing, customer engagement, and efficient data handling.
- * Built dynamic, reusable UI components in React.js, improving code maintainability and reducing frontend development time.
- * Architected a serverless backend using Firebase, leveraging Cloud Firestore for real-time data synchronization of vehicle locations and maintenance logs.

• Fit Pro [View Project](#)

- * Built a high-performance fitness landing page using React, Vite, and Tailwind CSS, optimized for fast load times and responsive design across devices.
- * Implemented client-side routing with react-router-dom to create a multi-page experience for workouts, nutrition, profile, and subscription flows without full page reloads.
- * Integrated Firebase (Auth, Firestore, Storage) to handle user authentication, persistent workout/nutrition data, and secure cloud data storage.
- * Developed advanced workout and nutrition features including a protein tracker, BMI/body analysis tools, and progress tracking dashboards with reusable, modular components.
